Lastolite

Professional

About the company

Lastolite was founded 21 years ago and has developed from a company that manufactured the original reflecting panel into a company that now offers a very extensive portfolio of market leading products. To maintain our leading edge we make significant investments into research and development. This ensures that we can continue to launch new innovative products to meet the needs of the ever changing photo and video markets. This brochure features more new products than ever before. There are a number of developments and additions to our existing portfolio as well as some major new concept products.

Lastolite's textile based products are all produced within our own manufacturing plants. Our strict quality standards enable us to deliver a world class product manufactured to the highest quality, ensuring it can withstand the repeated daily use of the most demanding user. This attention to detail and our commitment to deliver ground breaking products to the photo and video markets has led to the Lastolite brand being sold in more than forty countries world wide.

Three stitch lines

Two stitch line plus an upgraded zip

High performance fabrics

Our research and development team are continually looking at ways to further improve the way our products are manufactured. An example of this would be the rim tape we use on many of our products. It is now even stronger making the products using this tape even more durable. We have also introduced a triple stitch line on most of our products as opposed to using just one. This again adds strength and ensures the product will last for many years. Our reflective fabrics also continue to be developed to the highest specification not only for their reflective properties but also their construction which prevents cracking of the film and potential delamination. Finally to support these product improvements we have also developed a much more durable fabric for all the carry cases our products are supplied in. A high grade zip and multiple stitch lines construction ensure they will last as long as our products.

TriGrip

The expanded range of TriGrip reflectors now come with a new moulded handle with securing strap, allowing even more accurate positioning of the reflector with one hand.

This means that light can be directed to all those awkward spots e.g. under the chin and eyes without the need for stands or supports.

Close up without Tri-grips

Close up with Tri-grips

TriGrip designed by Gary Astill. A registered design.

New introductions to the TriGrip range:

- A new 'mini' size 45cm (18") – ideal for smaller objects or where a small area of fill in light is required. The mini TriGrips fold down neatly into a case measuring only 20cm in diameter, making them ideal to slip into your camera bag.
- A new surface:
 - Black** - Made from light absorbing velvet to accentuate shadows and create 'mood'. Also ideal for blocking an over bright sun.

Features

- ▶ Hold the reflector with just one hand
- ▶ Hold 2 reflectors, one in each hand
- ▶ New moulded handle with strap
- ▶ Allows accurate positioning
- ▶ Double sided
- ▶ Perfect for location work, as no stand is necessary
- ▶ Collapses to a third of its original size

Specifications

TriGrip Handle

The new moulded Tri Grip handle allows for even greater control when positioning the reflector. The Velcro fastening straps provide a more secure grip even in the most demanding conditions. The securing straps also allow you to support the reflector without actually gripping the handle, reducing the pressure on your wrist and fingers when held for prolonged periods.

The TriGrip can also rest comfortably against the knee leaving your hands free to operate the camera

TriFlips 8:1

Never get caught out again, up to 8 surfaces in the same bag. The TriFlips are designed to increase the versatility of the TriGrip reflector. Simply insert the TriGrip into the TriFlip sleeve for instant access.

- Features**
- ▶ Set up in seconds
 - ▶ Reversible
 - ▶ Seven surfaces
 - ▶ Taut professional finish

Collapsible Reflectors

Lastolite, the original manufacturer of collapsible reflectors, continues to improve the quality and variety of its reflector range.

As well as the the lifetime guarantee on reflector steel, Lastolite has also upgraded the rim tape to create a stronger, longer lasting reflector.

Features

- ▶ Collapsible / Reversible
- ▶ Lifetime rim guarantee
- ▶ Upgraded rim tape
- ▶ Six useful sizes
- ▶ Six essential colours
- ▶ Double-coated reflective surfaces
- ▶ Collapses to a third of its original size

Skylite

Skylite

For the location photographer who needs lighting control in the most demanding situations. The Skylites collapsable but rigid aluminium frame can be used in windy conditions.

Skylite Frames/Fabrics

Skylite frames, fabrics and accessories are available separately, so that you can mix and match as you choose. The range of materials includes 'Sunfire' - Lastolite's combination of Gold and Silver, which provides a uniquely warm, soft light, ideal for skin tones.

Skylite Kits & Accessories

For greater value choose a Standard or Premium Skylite Kit. The Standard kit contains a Silver/White reflector, 1.25 stops diffuser, frame and bag. The Premium kit offers a choice of Sunfire/White or Silver/White reflector and is ideal if you also require a crossbar handle and/or gripheads.

Features

- ▶ The hollow aluminium frame is incredibly light but extremely strong
- ▶ Resistant to rust so ideal for work in the rain
- ▶ There is an elastic cord running through the aluminium, so it's impossible to lose parts or leave anything behind
- ▶ Skylite fabric covers are double-sided and velcro easily into place for an impressively taut finish
- ▶ One bag fits all sizes

Ezyview

Ezyview is the ideal solution for any digital photographer who struggles to view their images on a laptop outdoors. The Ezyview eliminates the reflections from your screen and is of course, collapsible so is easy to carry with you.

Features

- ▶ Collapses to a third of its original size
- ▶ Waterproof fabric and steels
- ▶ Cover for viewing while using a keyboard

Specifications

Ezyview	Code
40cm (16") (will take PowerBook G4, 17")	2492

Colour Balance and Exposure Control

With the advent of digital photography not only has exposure and colour balance become more important when taking a photograph, the control and adjustment of these two factors has become much easier. However, having a known accurate reference point to work with either pre or post capture in Adobe Photoshop is essential. This group of products have been developed to help you make these necessary adjustments much easier.

EzyBalance

The EzyBalance 'point and shoot' allows you to concentrate on the important part of photography, composition and 'capturing the moment'. This handy double sided 'pop up' 18% grey/white card simplifies the complex technical issues surrounding exposure and colour correction when working in different lighting conditions. This provides a major benefit when working under pressure at events such as weddings or fashion shows.

A waterproof version is also available for Scuba Divers.

XpoBalance

The XpoBalance works in a similar way to the EzyBalance but has the added advantage of three different grey surfaces on one side and a black, white and 18% grey surface on the other side, collectively offering a range of white balance, exposure, colour correction and bracketing adjustment options.

TriBalance

The TriBalance is the same shape and size as our popular TriGrip product. Like the XpoBalance this product is incredibly versatile offering a black, white and 18% grey surface on one side and a silver reflective surface on the other.

Features

- ▶ Colour correction, pre and post capture
- ▶ Exposure control, pre and post capture
- ▶ Accurate colour rendition
- ▶ Collapsible, durable and cleanable
- ▶ Double sided
- ▶ Unique focusing target
- ▶ For use with digital or film photography
- ▶ Patent pending
- ▶ Collapses to a third of its original size

White Balancing the Camera

The EzyBalance, XpoBalance and TriBalance all feature a unique focusing target to enable the camera to focus on the card and take the necessary readings for an accurate white balance setting. Many cameras struggle to actually focus on a plain white or grey area.

A poorly exposed and colour balanced image.

Get the model to hold the EzyBalance.

Select the Custom White Balance setting on your camera (refer to your camera manual for instructions).

Zoom in so the EzyBalance fills the whole frame of the camera and take a reading off the card (refer to your camera manual for instructions).

Your White Balance is now set so you can re-take the shot with the correct exposure and colour balance.

Post Capture - Exposure and Colour Balancing

The EzyBalance, XpoBalance and TriBalance can also be used as an accurate reference point for post capture manipulation in Adobe Photoshop® (and other software packages). All you need to do is take the first shot with the card in the photograph each time you shoot in a different lighting situation.

A poorly exposed and colour balanced image.

Open up into Photoshop the image you took that included the card. Then open up the 'levels' adjustment window.

Select the grey dropper and click on the card. The poor exposure and colour balance is automatically corrected. Save these changes as a 'new action'.

You can then apply the 'new action' to the remainder of the batch from that shoot. All the images are automatically adjusted for you.

Post Capture - Exposure and Colour Balancing Effects

Due to the multiple surfaces on the XpoBalance and TriBalance, these cards can be used to create some interesting 'instant' effects as well as the features already mentioned above. The TriBalance has the added benefit of a reflective silver surface on the other side so it can also be used as a traditional reflector.

You can select the grey dropper and click on any of the three grey surfaces of the XpoBalance to give a slightly different exposure and colour balance effect.

light grey surface mid grey surface dark grey surface

white dropper grey dropper black dropper

You can use the black, white and grey dropper to click on their corresponding colour on the Xpobalance or Tribalance to emphasize that particular colour range in the shot.

Lighting Control

Lumen8

Lastolite's Lumen8 flash range has been designed to fulfil the needs of the most demanding working photographers. The range has been technically developed to a high level of specification offering reliability, durability and safety on location or in the studio.

The range is further enhanced with an extensive range of accessories which feature the popular S type bayonet fitting.

Features

- ▶ Available in 200w and 400w versions
- ▶ Auto dumping for quick light output changes
- ▶ 250w modelling bulbs so you can see clearly how you are working
- ▶ Switchable modelling light proportional or full power
- ▶ Audible ready light
- ▶ Fan cooled

Lumen8 Kits

The Lumen8 flash kit is designed for photographers who need to be mobile. The two head kit is supplied in a robust, hard wearing wheeled case, which can also be carried on the shoulder or by hand. The high quality specification continues with the inclusion of one of Lastolite's famous black/white PVC umbrellas and the world renowned Ezybox, the pop-up 60cm x 60cm softbox. And to finish off this ultimate flash kit two wide based, air dampened stands ensure that your lights are supported securely.

RayD8 c3200

The RayD8 c3200 kit provides an entry-level studio lighting system for product and portrait photography. Using a continuous tungsten light source (3200k), this kit is based on a 'what you see is what you get' approach. The soft white 80cm umbrellas included in the kit ensure the best distribution of the light.

Features

- ▶ S type bayonet fitting
- ▶ Removable reflector
- ▶ Wide range of accessories available
- ▶ Ideal for product photography

Specifications

Ezybox

How many times have you been on location and wished you had a TRULY portable softbox?

Until now, softboxes have generally been seen as a studio item either because they're too bulky to carry or take too long to assemble. A unique 'speedring' adaptor attaches in less than ten seconds with NO SCREWS, RODS OR FASTENERS of any type! EZYBOX really is "up in a flash".

Features

- ▶ Folds up just like a Lastolite reflector - the bag is 25cm (10") across (code 2460)
- ▶ Up and working in less than one minute!
- ▶ Very low light loss, only half a stop!
- ▶ Colour balanced

Specifications

EzyBox	Size	Code
Softbox* Small	45cm x 45cm (18" x 18")	2445
Softbox* Medium	60cm x 60cm (2' x 2')	2460

Ezybox Hotshoe

The new 38cm x 38cm Ezybox Hotshoe converts your battery operated tilt head flash gun from a harsh directional light into a soft light, that can then be mounted onto either a light stand or a camera bracket. The Ezybox Hotshoe folds flat in the same way as the other Ezybox models, but does not collapse.

Without Ezybox Hotshoe

With Ezybox Hotshoe

Features

- ▶ Softbox for Hotshoe flash

Triflector MkII

The Triflector is widely used in makeovers and fashion shots because the subject is given the Triflector's distinctive 'catch lights' to the eyes. The hinge mechanisms make all three panels individually adjustable to get light exactly where you need it. The panels each fold like our collapsible reflecting panels; the frame folds away and they all fit into a portable bag. Triflector MkII weighs only 1.2kg.

Without Triflector

With Triflector

Features

- ▶ Unique quality of light
- ▶ Overlight by up to 3 stops on negative film for 'porcelaine skin' effect
- ▶ Weighs just over 1kg

2m (80")*	-0.8f	7921

* All Jumbo Umbrellas come complete with a clamp and sandbag

Umbrella Box

The Umbrella Box is incredibly simple to assemble, fit and use. Its unique lighting effect is achieved by first bouncing the light off the back of the Umbrella Box and then diffusing it through the coated diffuser panel. Simply insert the flash-head reflector into the Umbrella Box and close the zipped openings for a quick set up.

Features

- ▶ Quick to set up - location or studio
- ▶ Universal fitting onto any light
- ▶ Lightweight and compact
- ▶ The 1.5m (60"), 2m (80"), and 3.75m (150") are all supplied with clamps or tilt

Lighting Control

Cubelite™

The Cubelite™ allows the photographer to control the lighting of products, minimizing shadows and isolating the subject from the background.

It's never been easier to take quick and crisp product shots on location or in the studio. The Cubelite™ has been enhanced in a number of ways so as to improve its utility:

- Background clips mounted in the roof for additional height.
- Open base for even floor surface, easier to fold, and enables positioning of cube over immovable items e.g. plants
- Front opens to edge of Cubelite™ for wider viewing angles.
- One new size - 45cm x 45cm (18" x 18")

The Cubelite™ offers a true location studio which instantly pops open ready for work.

Features

- ▶ Ideal for product shots
- ▶ Shadowless lighting
- ▶ Perfect for digital or film use
- ▶ Isolates subject
- ▶ Collapses to a third of its original size

Specifications

Cubelite™ Light Table PATENT PENDING

This illuminated table transforms the standard Cubelite™ into an even more versatile solution for product photography. Simply place the Cubelite™ on top of the light table and position an additional light source underneath it to create an illuminated base for the Cubelite™. This illuminated base virtually eliminates any potential shadows that may appear underneath the product being photographed. It's the perfect solution for creating shadow less and instant 'cut out' images. The light underneath the light table can be pointed downwards for a diffused even effect or upwards to create graduated backgrounds and other effects.

Features

- ▶ Available in two sizes
- ▶ Folds flat
- ▶ Includes an acrylic top surface for heavier items up to 8kg
- ▶ Includes a translucent background film to create an infinity curve

Specifications

LiteTable PATENT PENDING

The Lastolite still life table "LiteTable" will revolutionize your product photography with its ease of use and light control. It can be assembled in minutes (without the use of any screws, bolts or allen keys!) and folds flat into a handy carry case when not in use, making it ideal for occasional use and location work. The unique patented design allows the photographer to control the light distribution underneath the table by positioning the light in different ways, creating graduated backgrounds or a completely even tone. With gels the creative possibilities are endless. Many of these techniques have previously been difficult with conventional light tables as they have open sides underneath.

Features

- ▶ Available in two sizes
- ▶ Folds flat
- ▶ Includes an acrylic top surface for heavier items up to 8kg
- ▶ Includes a translucent background Film to create an infinity curve

Studio Cubelite™

The Studio Cubelite™ is the ultimate solution for product photography and takes our highly successful Cubelite™ concept even further. It allows for control of the light from below and all other directions allowing the photographer to give products that floating look with no shadows if desired. The tensioned diffuser fabric means the reflections on even the most reflective surface are kept to an absolute minimum, whilst the generous front opening can be closed to mask reflections from the camera/operator as well. The patented design also allows you to control the light from underneath by pointing the source up or down into the base unit giving different light distribution effects and creating graduated backgrounds if required.

Features

- ▶ 360 degree lighting
- ▶ Full shadow control
- ▶ Reflection control
- ▶ Collapses flat in minutes with simple tensioning rods
- ▶ Features a unique base diffusion system
- ▶ Includes a diffused film to create the translucent background
- ▶ Includes an acrylic top surface for heavier items up to 8kg

ePhotomaker

The ePhotomaker has been designed for eBay and other online auction users looking to improve their photos on the web.

Having well-lit photos that are an accurate colour can make the difference between selling or not selling a product. The ePhotomaker does this by putting a diffusing fabric on one side of the product to soften the light and a reflector to fill in the shadows on the other side. All you need to provide is an ordinary domestic light.

The ePhotomaker kit includes an EzyBalance grey card to control colours and exposure resulting in photographs with crisp white backgrounds that can be dropped straight onto a web page. The kit also includes a tabletop tripod which ensures that the photos are not blurred due to camera shake.

Light Tents

On location or in the studio, Light Tents provide soft, shadowless light and are an excellent method of isolating a subject from its environment.

Features

- ▶ Ideal for anyone selling products using the web
- ▶ Supplied with a blue gel to simulate daylight lighting conditions
- ▶ Collapsible - easy to store
- ▶ Built in reflector on one side, diffuser on the other side
- ▶ Kit contains ePhotomaker, EzyBalance, Blue daylight gel, clips and Tripod

Specifications

ePhotomaker	Code
ePhotomaker Small Kit	2484
ePhotomaker Large Kit	3684

ePhotomaker kit contains:

- ePhotomaker
- EzyBalance 'Point and Shoot' (grey surface only)
- Table top tripod
- Blue daylight gel with clips

Features

- ▶ Four Sizes
- ▶ Portable
- ▶ Lightweight
- ▶ Collapses to a third of its original size
- ▶ Access from any angle

Dyed Curtain/Muslin Backgrounds

Especially useful for kids, pets and sports - this extensive range of curtain backgrounds gives photographers the colours and patterns to express their creativity.

The backgrounds can be draped over props or bunched for added texture. They are all 3m (10') wide and come with a handy tote bag. They have a hem along the shortest edge to insert a pole for support.

Washables

Fully machine washable at 40°C (105°F) in a large washing machine, these backgrounds are for photographers who use backgrounds extensively. The colours take their inspiration from American States.

Features

- ▶ This range is available in 3m x 3.5m (10' x 12') and 3m x 7m (10' x 24')
- ▶ Especially designed for use with kids, pets and sports
- ▶ Support systems available
- ▶ Extensive colour range

Dyed Collapsible Reversible Backgrounds

This extensive range of collapsible backgrounds gives photographers the colours and patterns to express their creativity.

The 1.8m x 2.15m (6' x 7') backgrounds with train have been modified and now use Lastolite's knitted 'crease resistant' fabrics (currently used on our 5"x6" backgrounds) making it even easier to work with our full length collapsible backgrounds.

Features

- ▶ Crease resistant fabric
- ▶ The ultimate location accessory
- ▶ Collapses to a third of its original size
- ▶ Ideal for portraits on location or in the studio
- ▶ Can be used for solo portraits or smaller groups
- ▶ Zip up bag
- ▶ Reversible
- ▶ Combine with Lastolite's background support system (1108) on page 32

Backgrounds

HiLite Backgrounds PATENT PENDING

The HiLite backgrounds range allows the photographer to work in a way that was extremely difficult to achieve in the past, 'High Key' photography on location and in restrictive spaces. By rear lighting the white background itself there is no longer a need to use a background light behind the subject. Furthermore, because the background is actually illuminated it means the subject can stand virtually right in front of it without casting a shadow. The HiLite backgrounds also works as a large rear softbox and illuminates the subject as well, meaning you can use just one other flash head to light the subject from the front. What's more, the whole thing is collapsible.

Features

- ▶ Available in two sizes 1.5m x 2.15m (5' x 7') and 1.8m x 2.15m (6' x 7')
- ▶ Can be rotated and used on its short or long edge
- ▶ An optional 'wipe clean' vinyl train is also available that attaches to either edge for full length work
- ▶ Can be suspended on our 1108 background support system
- ▶ Can even be used as a very large softbox
- ▶ Free standing

Specifications

Description	Code

Superwhite Vinyl Backgrounds

Lastolite's 'wipe clean' Superwhite vinyl background can literally be used over and over again. Simply wipe away any dirt or footprints at the end of your shoot, then roll it back up ready for next time! It couldn't be easier. Supplied on a roll the same width as our standard paper backgrounds (2.75m) the Superwhite vinyl can easily be suspended using our 1108 background support system.

Features

- ▶ Wipe clean
- ▶ Long lasting
- ▶ Ideal for 'High Key' photography
- ▶ Same width as Lastolite's paper rolls

Chromakey Collapsible Reversibles

Chromakey has been used in film and cinema production as a tool to mix two or more images together in all aspects of the art. It is increasingly used in digital photography to cut and paste a subject onto a background.

Features

- ▶ Reversible
- ▶ Chromakey rim tape as standard
- ▶ Crease resistant fabric
- ▶ Fast to set up and dismantle
- ▶ For inside and outside use
- ▶ Collapses to a third of its original size
- ▶ Certified fire proof fabric

Specifications
